SUMMARY

Software Engineer with 3+ years of experience building scalable full-stack applications in Agile and cross-functional environments, with strong interest in data modeling and system design. Experienced in developing and deploying cloud-native systems on AWS. Recently focused on building applications with LLM integrations, RAG pipelines, and agentic AI workflows.

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, C

Development tools: HTML, CSS, Node.js, FastAPI, React.js, Angular.js, Hibernate ORM, MongoDB, PostgreSQL, Next.js,

CI/CD, SDLC and Cloud tools: Docker, Kubernetes, Terraform, Packer, AWS, Azure, Jenkins, SonarQube

ML/AI tools: PyTorch, Keras, Scikit learn, LangChain, OpenAI Agents SDK, Hugging face, Claude Code, Github Copilot

Certification: AWS Certified Solutions Architect – Associate, Azure Data Fundamentals (DP-900)

EXPERIENCE

Software Engineer Co-op | *Nokia*

Sep 2024 – Dec 2024

- Designed and delivered **Business Operating System (BOS)**, a cloud-based purchase order and billing portal for Nokia's **EDA SaaS**, streamlining customer order management, invoicing, and billing workflows for sales teams
- Built **secure REST APIs** using **Spring Boot, Spring Security, and JWT-based authentication** with RBAC to manage purchase orders, licensing, RTUs, and invoicing in a multi-tenant system
- Designed and implemented the data layer using **PostgreSQL**, ensuring reliable handling of multi-tenant data and transactional billing workflows
- Developed frontend using **React** and **Redux**, delivering interactive dashboards with both **customer and Nokia sales views** for real-time billing, payments, and usage tracking
- Containerized and deployed using **Docker Compose** and **GitLab CI/CD**, delivering a production system used in **live sales demos and deal signings**, significantly reducing manual effort for sales teams

Full Stack Engineer | *Accenture*

Jan 2022 – Jul 2023

- Developed backend services for the **Retirement Plan Payments Portal**, supporting enterprise-scale payment processing workflows in Agile cross-functional teams
- Owned bulk file processing pipelines for multiple payment types, enabling **efficient processing of upto 10,000 payments** per upload
- Optimized **DB2 queries** using MyBatis, improving performance for large datasets and resolving critical UAT release blockers
- Redesigned validation workflows by replacing hardcoded logic with a **JSON-based rules service**, resolving **20+ critical UAT defects** and improving system flexibility through collaboration with client and business teams
- Accelerated QA timelines by supporting automation testing efforts, **reducing testing cycle time by 40%** and enabling earlier production readiness

PROJECTS

Avatar AI - Multi-Tenant AI Avatar Platform | *FastAPI, OpenAI Agents SDK, Pinecone, React, AWS*

- Built a multi-tenant AI platform using FastAPI, OpenAI Agents SDK, and RAG (Pinecone), enabling users to deploy personalized chatbots from custom data
- Designed an agentic system with dynamic tool selection and deployed on AWS with a React dashboard for real-time knowledge management

LiftLog - AI-Augmented Full-Stack Application | *Next.js, TypeScript, PostgreSQL(Neon), Drizzle ORM, Zod, Claude Code, MCP*

- Built a full-stack Next.js application using **Claude Code**, demonstrating structured agentic workflows for production-grade development
- Designed a constraint-driven architecture with Zod validation and MCP-based workflows for intelligent data handling

AWS Infra Deployment with Terraform and CI/CD | *AWS, Terraform, Docker, GitHub Actions, Spring Boot, PostgreSQL*

- Provisioned AWS infrastructure using Terraform (VPC, ALB, EC2, Auto Scaling, IAM, RDS) for scalable and fault-tolerant deployment
- Built CI/CD pipelines using GitHub Actions and Docker to automate build, test, and deployment of a Spring Boot application backed by PostgreSQL on AWS RDS

EDUCATION

Northeastern University

Boston, MA

Master of Science in Software Engineering Systems — GPA: 3.86/4.0

Sep 2023 – Dec 2025

Sri Sivasubramaniya Nadar College of Engineering

Chennai, India

Bachelor of Engineering in Electrical and Electronics Engineering — GPA: 7.61/10.0

Aug 2017 - May 2021
